

Virginia Water Resources Research Center
and
Department of Forestry
College of Natural Resources
Virginia Polytechnic Institute and State University
Blacksburg, VA 24061

**Research Assistant Professor,
Forest Hydrology**

Type of Appointment: Nine-month academic-year appointment (non-tenure-track) located in Blacksburg, Virginia.

- Responsibilities:** Research in forest hydrology and watershed management
- Conduct research in the area of forest hydrology and watershed management and publish the results in refereed literature
 - Develop component of research program in collaboration with the Virginia Department of Forestry (state agency)
 - Acquire external grants and contracts to fund an innovative research program
 - Participate in graduate education
 - Participate in outreach programs of the Virginia Water Resources Research Center, Department, College, and Virginia Department of Forestry (state agency)
 - Participate in university service and governance

Qualifications: Required: Ph.D. with emphasis in forest hydrology/watershed management or in a closely-related area. Strong interdisciplinary background in forest hydrology/watershed management and experience with operational forestry highly desired. At least one degree in forestry strongly preferred.

Salary: Commensurate with education and experience

Deadline: Review of applications will begin on June 1, 2008, and continue until a suitable candidate is selected.

Starting Date: Negotiable, with a target of August 10, 2008

Application Procedure: Online application is required via the Virginia Tech Human Resources website (www.hr.vt.edu) Search "Available Jobs," Posting Number 080107.
